### Why Advantage

Advantage has been at the forefront of cyber security and cyber threat intelligence for the past 7 years. We understand how important it is to you that your data is safe.

Advantage is **ISO27001** certified, meaning you can trust that we apply trusted security and information practices.

### Overview

The AdvantageProtect SIEM as a Service gives you access to a New Zealand based expert Security Operations Centre. Our team comprises of several qualified and experienced cyber security analysts and engineers, further supported by consultants and incident responders.

Our SIEM service is underpinned by LogRhythm and complemented by a fully managed service overlay. It is a highly affordable model that delivers security monitoring services with proactive intelligence, alerting, triage and reporting in a managed model.

Our service removes the need for organisations to hire, train and retain SIEM engineers and SOC analysts, as well as cost of purchase, installation, and maintenance of the platform. The AdvantageProtect service is quite unique in that we provide access to the SIEM web console to clients so they can perform their own threat hunting and data queries as they need.

A summary of key service inclusions are:

- Automatic monitoring, analysis and alerting across your business
- Deep elastic search technology allowing insight into log data
- Automatic incident opening and reporting to you
- 24/7 service for critical incidents
- Managed and monitored by a team of SIEM certified security experts
- Monthly reporting providing valuable insights and trends
- Threat intelligence from various commercial and open-source feeds, including NCSC Malware Free Networks
- Access to customer portal for co-pilot
